

Part Number for standard CG Style gaskets are generated as follows:

e.g. 010010008

010 indicates NPS (Nominal Pipe Size) is 1"
01 indicates pressure class 150
00 indicates winding metal, 304 stainless steel
08 indicates filler material, Flexicarb

Metal and Filler Material Codes

Metal		Filler	
00	304 Stainless Steel	06	PTFE
02	316 Stainless Steel	08	Flexicarb
03	347 Stainless Steel	17	Flexite Super
06	Monel		

Note:

1. The part numbering system holds good for Style CG gaskets made in accordance with ASME B16.20.
2. See General Catalog for additional information on Flexitallic Standard Style CG, Large Diameter Style CG, Style M, Style MC, and Style T Gaskets.
3. ASME B16.20 calls for use of inner rings on class 900, 1500, and 2500 sizes in shaded area. Inner ring prices vary by material and are not included.
4. Monel/PTFE gaskets are commonly used for hydrofluoric acid alkylolation.
5. Prices for additional sizes and higher pressure ratings of 2000 lbs. and above available on request (for Style M, MC, and T).
6. Style M's available with solid metal inner ring (MCS).
7. Standard Gasket thickness is .175".
8. Prices subject to change without notice.
